asked [redacted] if he would arrange to have [redacted] contacted and debriefed. [redacted] said they would be happy to do so and will provide us with a report on the debriefing.

25X1

[redacted] Talked with George Murphy, Joint Committee on Atomic Energy staff. I told him we would be happy to assist the Committee in disposing of a collection of classified waste and also left with him a brochure and a sample of the end product from a waste disposal unit which the Agency has approved and is using.

As a result of a request from the Director, I asked the Joint Committee staff to review Mr. McCane's testimony before the Committee when he was Chairman of the Atomic Energy Commission on the subject of a ban on atmospheric testing. Several references were located and the substance of these passed on to the Director.

Murphy referred to a communication which the Director had sent to Senator Pastore of an extremely sensitive nature involving Soviet tests. The communication indicated we would be in further contact with the Committee as information was developed. Murphy asked if there had been any new developments on this subject. I advised we would look into the matter and be in touch.

In response to his request for information on spy cases, I told Murphy it was the Director's feeling that more complete information on these cases could be obtained from the Atomic Energy Commission and the FBI. Murphy said he understood our reasons for this and would contact those agencies.

25X1

[redacted] advised that he had briefed George Murphy today on the latest Bethe Panel Report as we had previously agreed to do.
